PROJECT EXPERIENCE

Messaging Web Application LamaChat

It is a messaging app developed using the MERN stack.

- Developed a real-time messaging application using the MERN stack, enabling seamless and efficient communication between users.
- Leveraged MERN technologies to create a user-friendly interface and a robust backend system for effective data management and real-time messaging functionality.
- Demonstrated strong software development skills and a keen understanding of modern web technologies to deliver a high-quality, responsive messaging platform for enhanced user engagement.

TO-DO List ToDo List

It is a To-Do List app built using JavaScript and Node.js.

- Developed a feature-rich To-Do List application using JavaScript and Node.js, empowering users to efficiently create, manage, and organize their tasks.
- Implemented key features including task creation, completion tracking, and task deletion, enhancing user productivity and task management capabilities.
- Showcased strong proficiency in front-end and back-end technologies, delivering a user-friendly and responsive application that streamlines task management for users.

SKILLS

Teamwork and good at problem solving
